

UNIVERSITY OF
CALGARY

We are looking for research volunteers!

Are you a practitioner working with older adults?

Are you interested in helping us identify how print or computer based information may help us learn about elder abuse and neglect? The National Initiative in the Care of the Elderly (NICE) is interested in hearing from you.

We would like to talk with you about your experience of using information to learn about elder abuse and neglect. You will be asked to complete two surveys either by print or computer format. You may also be asked to be interviewed either in person or by telephone.

For more information and to see if you qualify, please call Dr. Sandi Hirst **(403) 220-6270** and leave a message **or email at nice@calgary.ca** (including your name and telephone number).

We will return your call to explain the study.
